The original bathroom had an oversized tub deck and a see-through fireplace into the master bedroom. They were replaced with a dedicated makeup area and a freestanding slipper tub. This created a more spacious effect. Design features include:

- Barrier free shower with a frameless glass door and a linear drain to allow for oversized floor tile in the shower.
- Dark grey accent wall in shower.
- Custom cabinetry.
- Heated floor throughout including the shower floor and bench seat.
- Stacked stone accent wall behind bathtub.
- Dimmers on all lighting.
