

EXTERIOR REMODEL UNDER \$100,000

GOLD

BUSINESS PARTNERS

The goal for this project was to convert an existing screened porch to interior living space and replace the existing arbor with a new pergola reminiscent of something that would be seen in an Italian countryside. A timber-framed roof structure was designed with cedar cross members woven together creating interest. The breadth of windows brings light to the interior of the home and provides a view to the pergola and gardens beyond. The space flows seamlessly from interior to exterior for entertaining or enjoying a summer evening.
