

INTERIOR REMODEL UNDER \$75,000

GOLD

The newlywed homeowners of this 1926 home needed to “de-bachelorize” the house and make space for a master bathroom and closet space for two. The owners initially asked for a room addition design but the budget was not adequate. The designer creatively carved the existing long, rectangular master bedroom space into four new spaces: new master bathroom, his & hers walk-in closets and a moderately sized bedroom. The couple gave up their tub “wish list” item in the new master bath choosing instead to remodel the hall bathroom, resulting in two beautiful bathrooms and a thoroughly updated home.
