

# KITCHEN REMODEL \$100,000 - \$150,000

## GOLD ★ ALL STAR ★

The client was frustrated with a kitchen in the middle of everything and not open to anything. The only solution was to tear out the perimeter walls to allow views of the lake on the left, pool on the right and the living space open in front. Designing a one wall kitchen with a large island can make for a very efficient galley kitchen. Appointing that space with Bentwood cabinets, Sub-Zero / Wolf appliances, a combination of granite and walnut countertops all with a view describes this client order as simply “Everything please with extra impossible”.
