

BATH REMODEL

\$75,000 - \$100,000

BUSINESS PARTNERS

When the ceiling in the newly remodeled kitchen began leaking, it was time to perform not only maintenance on the master bathroom above, but it needed a complete overhaul. The project in this 1915 home required the right design to make it function in the modern world while looking original to its Southern Colonial roots. Marble-look porcelain tiles create the canvas. The new double-slipper tub accented with period-style fixtures rests on new hexagonal porcelain tiles. The flush-construction of the cabinetry pays homage to cabinets of this period, and yet it hosts practical storage pullouts and electrical access for today's appliances.
