

DESIGNS & PLANS

GOLD

BUSINESS PARTNERS

The homeowners reside with their special needs adult daughter. She has an opposite sleeping schedule and they wanted to give her an area that would be her own and provide her the independence she deserves. The layout takes half of the existing garage and created a pantry and laundry room. The addition consists of the 2 car garage and generation suite which includes a sitting area, bedroom, bath, and generous closet with laundry facility. The bathroom contains a zero entry shower and ample space for maneuvering. The kitchen serves as the buffer space between parents and daughter. Opposing schedules resolved!
