

DETACHED STRUCTURE

GOLD

The homeowner at this 100+ year-old property sought to create a vacation-like destination for friends and family on their property while matching every pre-existing detail. Working with ample space, a unique four-sided infinity pool, outdoor kitchen with full amenities, and pool house with custom spa were created. The outdoor space was tied into the original home with Ipe pergolas mounted on stone columns, creating a resort-like view path from the entryway to the end of the pool deck through the columns. Close collaboration throughout the project made the homeowner's dream a reality.
