This 8'x8' small bath off a 2nd floor master bath needed a total remodel. The owners desired a double sink vanity. The toilet was relocated to the opposite side of the room to make space for their double sink vanity. The beautiful 48x32 although not large, is a design highlight with period correct tile and fits their needs perfectly. The addition of an in-wall heater and much needed instillation warms the room perfectly without taking up valuable space. In the end, the bathroom functions as a modern master bath that looks as if it should be in a 1928 home.
